

# Environmentally Conscious Shipping made easy!

MP Global Product's Thermal Packaging offers a variety of sustainable shipping containers designed for temperature control and protection. The patented enhanced cotton insulating materials used in all our products offer soft cushioning thermal protection and are ASTM tested to be biodegradable in less than one year. MP Global's protective poly films contain a special additive that attracts microbes and stimulates biodegradation to occur in greater than a year.

MP Global's patented "super" insulated envelopes and box liners offer variable thicknesses of insulating padding made from select, purified, recycled textile fibers that are super-absorbent and contain an EPA-approved antimicrobial additive for cross-contamination prevention.

This unique combination provides the superior thermal protection necessary for extended controlled temperatures. MP Global's envelopes and box liners can protect all manner of temperature-sensitive products from medical, pharmaceutical, veterinary, and confectionary, to a wide variety of foods like meats, poultry, pies, cakes, and even fine wines.

MP Global's biodegradable cotton enhanced insulation products offer a superior environmentally conscious solution for all types of temperature sensitive packaging when compared to non-biodegradable foam type coolers.

## PRODUCT ATTRIBUTES:

- User-friendly / Flexible / Unbreakable
- High Insulation Value: **R-3.83 per inch**
- Biodegradable Cotton Enhanced Insulation
- Variable Thickness / Free Custom Sizing
- Reversible Perforated or Non-perforated Inner Film
- Absorbs Unwanted Condensation
- Antimicrobial to Guard Against Cross-Contamination

## SAVES MONEY:

- Compressed Bundles/ More Units Per Pallet
- Reduced In-Bound/Out-Bound Freight
- Less Warehouse Space Required
- Eliminates Shrink – No Cracked Coolers
- Faster Fulfillment Reduces Labor Cost
- Right Sized to Reduce DIM-Weight Charges
- Cushioned – Less Product Damage

## ASSEMBLY INSTRUCTIONS

Use the illustration to the above right to correctly assemble and use your MP Global Product's insulated box liner insert.

1. Fit piece labeled **SIDE A** into the bottom and side of box.
2. Leave the top of **SIDE A** (labeled **LID** in the illustration) open to allow insertion of **SIDE B**.
3. From the top, insert **SIDE B** into the box, ensuring a snug and tight fit along the sides and bottom.
4. Close the top (LID) of **SIDE A** to finish insulation chamber assembly.
