

# Chilled Wine Shipping made easy!

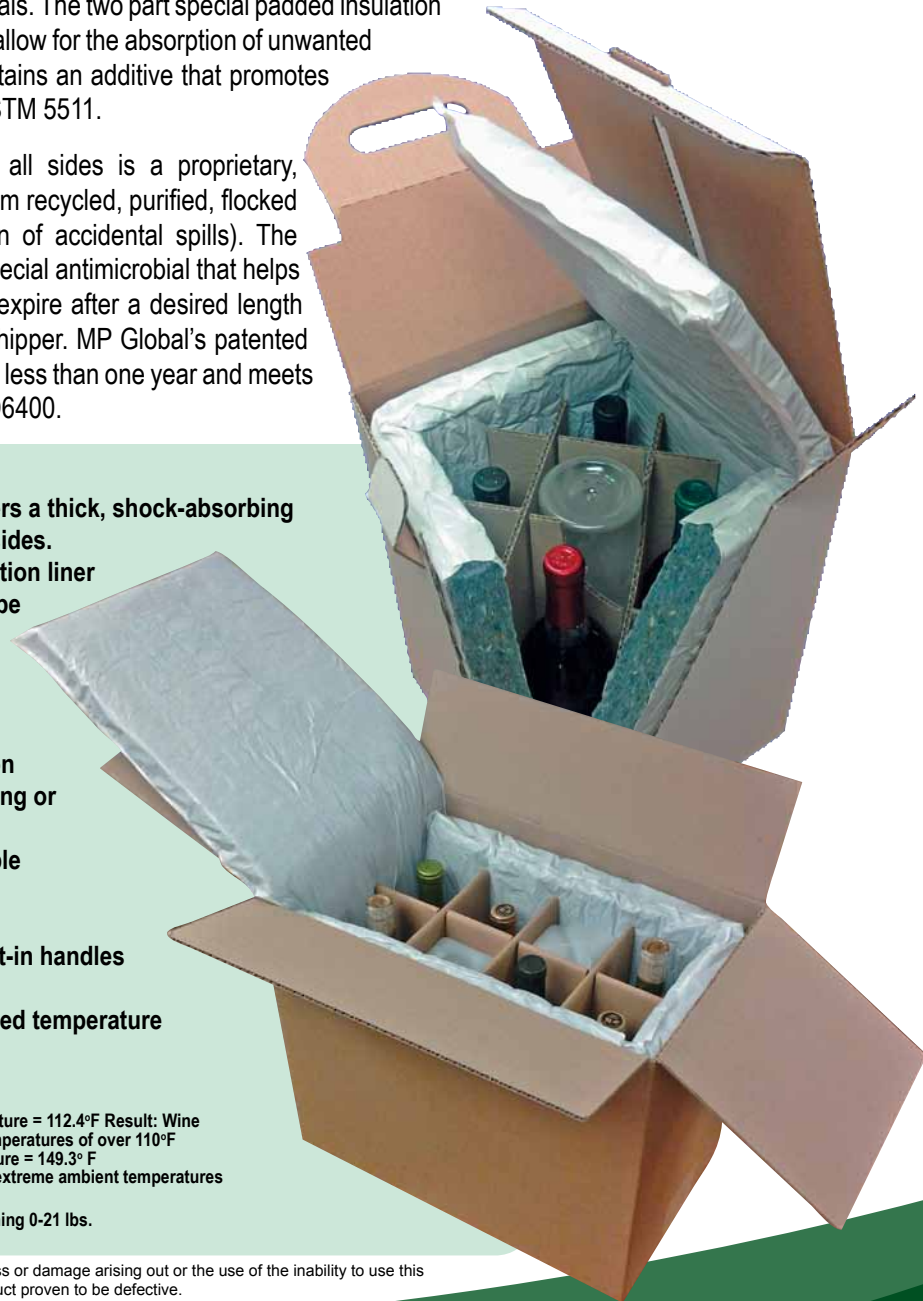

## Chilled Wine Shipper 4-6 Bottles

MP Global's Chilled Wine Shipper is a temperature-control shipping carton that is made with environmentally preferable insulated padding and materials. The two part special padded insulation liner has an inner and outer surface that is perforated to allow for the absorption of unwanted condensation or accidental spills. This special poly contains an additive that promotes biodegradation in greater than one year as tested by ASTM 5511.

Sandwiched between the poly films and sealed on all sides is a proprietary, biodegradable enhanced cotton insulation pad made from recycled, purified, flocked textiles which are super-absorbent (for the absorption of accidental spills). The flexible cushioning insulation padding also contains a special antimicrobial that helps to prevent cross-contamination and is programmed to expire after a desired length of time to allow an eventual degradation of the Wine Shipper. MP Global's patented enhanced cotton insulation will completely biodegrade in less than one year and meets the current FTC Green Guidelines as tested by ASTM D6400.

### PRODUCT ATTRIBUTES:

- MP Global's Cotton enhanced insulating padding offers a thick, shock-absorbing liner that cushions and protects your payload on all sides.
- The durable poly film encapsulating the cotton insulation liner is perforated to allow unwanted moisture or spills to be wicked away – protecting your bottle labels.
- Engineered corrugated separators prevent shifting of bottles during transport and handling
- Available in four and six bottle complete systems or custom sized liners to fit your existing shipping carton
- Maintains ideal temperature range allowing for shipping or transporting fine wines year round.
- Unique patented cooling chambers allow for adjustable amounts of refrigerants to control your temperature requirements.
- 4-Bottle Shippers have one cooling chamber and built-in handles for easy carrying or fold-flat for shipping.
- 6-Bottle Shippers have two cooling chambers for added temperature control during shipments.
- Test Results:
  - \*48 Hour Duration Test / 2.66 lbs. Refrigerant / Maximum ambient temperature = 112.4°F Result: Wine temp. remained under 70°F enduring 20+ hours of external ambient temperatures of over 110°F
  - \*24 Hour Duration Test / 1.5 lbs. Refrigerant / Maximum ambient temperature = 149.3° F Result: Wine temp. remained under 80°F withstanding over 5 hours of extreme ambient temperatures exceeding 140°F
  - \*Durability Test: Lab test to exceed ISTA-1A drop test for packages weighing 0-21 lbs.

Note to Purchaser: Neither seller or manufacturer shall be liable for any loss or damage arising out of the use of the inability to use this product. Seller and manufacturer's only obligation shall be to replace product proven to be defective.
